Small Tortoiseshell Felt Puzzle

A Giant Insect World puzzle
build it · take it apart · build it again

You will need:

- Orange, black & dark-brown felt
- Scissors
- This instruction sheet and template
- The green felt mat for meadow habitat (optional)

How to build it

- 1 Trace each shape onto the right felt colour.
- 2 Cut out all 9 pieces carefully.
- 3 Lay the green mat down — that's your meadow!
- 4 Place the 2 hindwings, then 2 forewings on top.
- 5 Lay the body down the centre, over the wings.
- 6 Add a marking to each forewing and 2 antennae. Done!

Did you know?

One of Britain's most common, colourful butterflies.

Adults hibernate over winter, often in sheds.

Its caterpillars eat only stinging nettles.

It basks with wings open to warm up in the sun.

The blue crescents on the wing edge warn off birds.

The pieces

Find these colours in felt or paper

Orange · Black · Dark brown

Using the template, cut out:

Forewings ×2 — orange (one mirrored)

Hindwings ×2 — orange (one mirrored)

Markings ×2 — black

Body ×1 — dark brown

Antennae ×2 — dark brown

That's 9 shapes in total!

Optional: white wingtip dots & blue edge dots.

Finished!

Your butterfly is about 13 × 9 cm.

Take it apart and build it again!

Forewings over hindwings, body down the centre.

Collect the set:

Meadow: butterfly, ladybird, grasshopper
