Diving Bell Spider Felt Puzzle

A Giant Insect World puzzle
build it · take it apart · build it again

You will need:

- Dark-brown & pale-silver felt
- Scissors
- This instruction sheet and template
- The blue felt mat for pond habitat (optional)

How to build it

- 1 Trace each shape onto the right felt colour.
- 2 Cut out all 11 pieces carefully.
- 3 Lay the blue mat down — that's your pond!
- 4 Place the pale air bubble — its diving bell.
- 5 Round body at top, big abdomen on the bubble.
- 6 Add 8 legs — 4 each side, spread wide. Done!

Did you know?

The only spider that lives its whole life underwater.

It spins a silk "bell" and fills it with air from above.

It breathes the trapped air like a tiny aqualung.

Britain's only underwater spider.

It hunts water insects and tiny pond creatures.

The pieces

Find these colours in felt or paper

Dark brown · Pale silver

Using the template, cut out:

Cephalothorax ×1 — dark brown (front body)

Abdomen ×1 — dark brown (round rear)

Legs ×8 — dark brown

Air bubble ×1 — pale silver

That's 11 shapes in total!

Finished!

Your bell spider is about 8 × 8 cm.

Take it apart and build it again!

Body sits on its air bubble, 8 legs out wide.

Collect the set:

Aquatic: river skater, dragonfly, bell spider
