Meadow Grasshopper Felt Puzzle

A Giant Insect World puzzle
build it · take it apart · build it again

You will need:

- Green, tan & black felt or paper
- Scissors
- This instruction sheet and template
- The green felt mat for meadow habitat (optional)

How to build it

- 1 Trace each shape onto the right felt colour.
- 2 Cut out all 9 pieces carefully.
- 3 Lay the green mat down — that's your meadow!
- 4 Place the body, head to the left; wing on its back.
- 5 Add the big hind leg: femur, then thin tibia.
- 6 Add 2 front legs, the eye and 2 antennae. Done!

Did you know?

It "sings" by rubbing its legs against its wings.

Its big back legs can jump 20× its body length.

Green or brown, to hide among the grass.

Listen for its soft "rrr-rrr" on warm summer days.

It eats grass and basks in the sun.

The pieces

Find these colours in felt or paper

Green · Tan · Black

Using the template, cut out:

Body ×1 — green

Wing ×1 — tan

Hind femur ×1 + tibia ×1 — green

Front legs ×2 — green

Eye ×1 — black

Antennae ×2 — green

That's 9 shapes in total!

Finished!

Your grasshopper is about 11 × 6 cm.

Take it apart and build it again!

Bend the hind leg into a Z — ready to spring!

Collect the set:

Meadow: butterfly, ladybird, grasshopper
